CEO'S STATEMENT

Taking our company further

**“Building our own bridge
towards success”**

“Success lays on the constant efforts invested in learning and the ability to adapt to the change.”

Nitmark Technologies was started in 2017 with a group of people who were enthusiastic about making a difference in society.

We initially embarked on our journey with the aim of being one of the optimal solution providers for the Network related requirements. With the growing partnerships we try to expand our scope.

We believe the best will be achieved by having more experiences and maintaining a growing culture. So we see every day as an opportunity to develop & a moment to wake up the innovativeness.

Nitmark Technologies aims to further grow to ensure quality service for all your ICT needs and becoming an employee-friendly workplace.

**Sujith De Abrew
(Director/CEO)**

ABOUT US

Who are we?

Established in 2017 Nitmark Technologies specializes in providing quality and timely solutions for all your networking and ICT needs. The team comprises of experience professionals (each with 15+ years of experience) with an impeccable track record in the field of networking and support services.

Key customers include Banks, medium to large manufacturing companies, telecommunication providers and leading corporate brands

VISION

Nitmark Technologies is dedicated with pleasure to ensure the upliftment of every citizen's life through providing high-value IT Infrastructure and support to our clients who are from different sectors.

MISSION

Our five-year mission is to mark an important and indelible affect in IT Solution Providing sector, through helping our clients to enhance the sustainability and develop long lasting relationships with their respective customers.

OUR VALUES

We follow seven values within our organizational culture. These are defined for maintaining a healthy impact on all the aspects of our business from the individual employee attitude to the relationship with each of our stakeholders.

Nimble

Considering time as an important fact in business context, we continuously improve through creativity and innovation in order to provide the best support efficiently.

Integrity

We value integrity in all the relationships and show our transparency and consistent in every decision and action we take.

Teamwork

We believe the best result will achieved when the collaboration among the members are directed to a SMART goal.

Mutual-respect

We act with mutual respect where every person's diversity is accepted and clear moral principles are followed.

Activate Sustainability

We encourage sustainable culture for our organization and for the society. Our decisions are taken after considering the needs of future generations.

Responsibility

We value a dynamic environment with well-managed responsibilities. Individual awareness will play an important role in developing awareness in organization level.

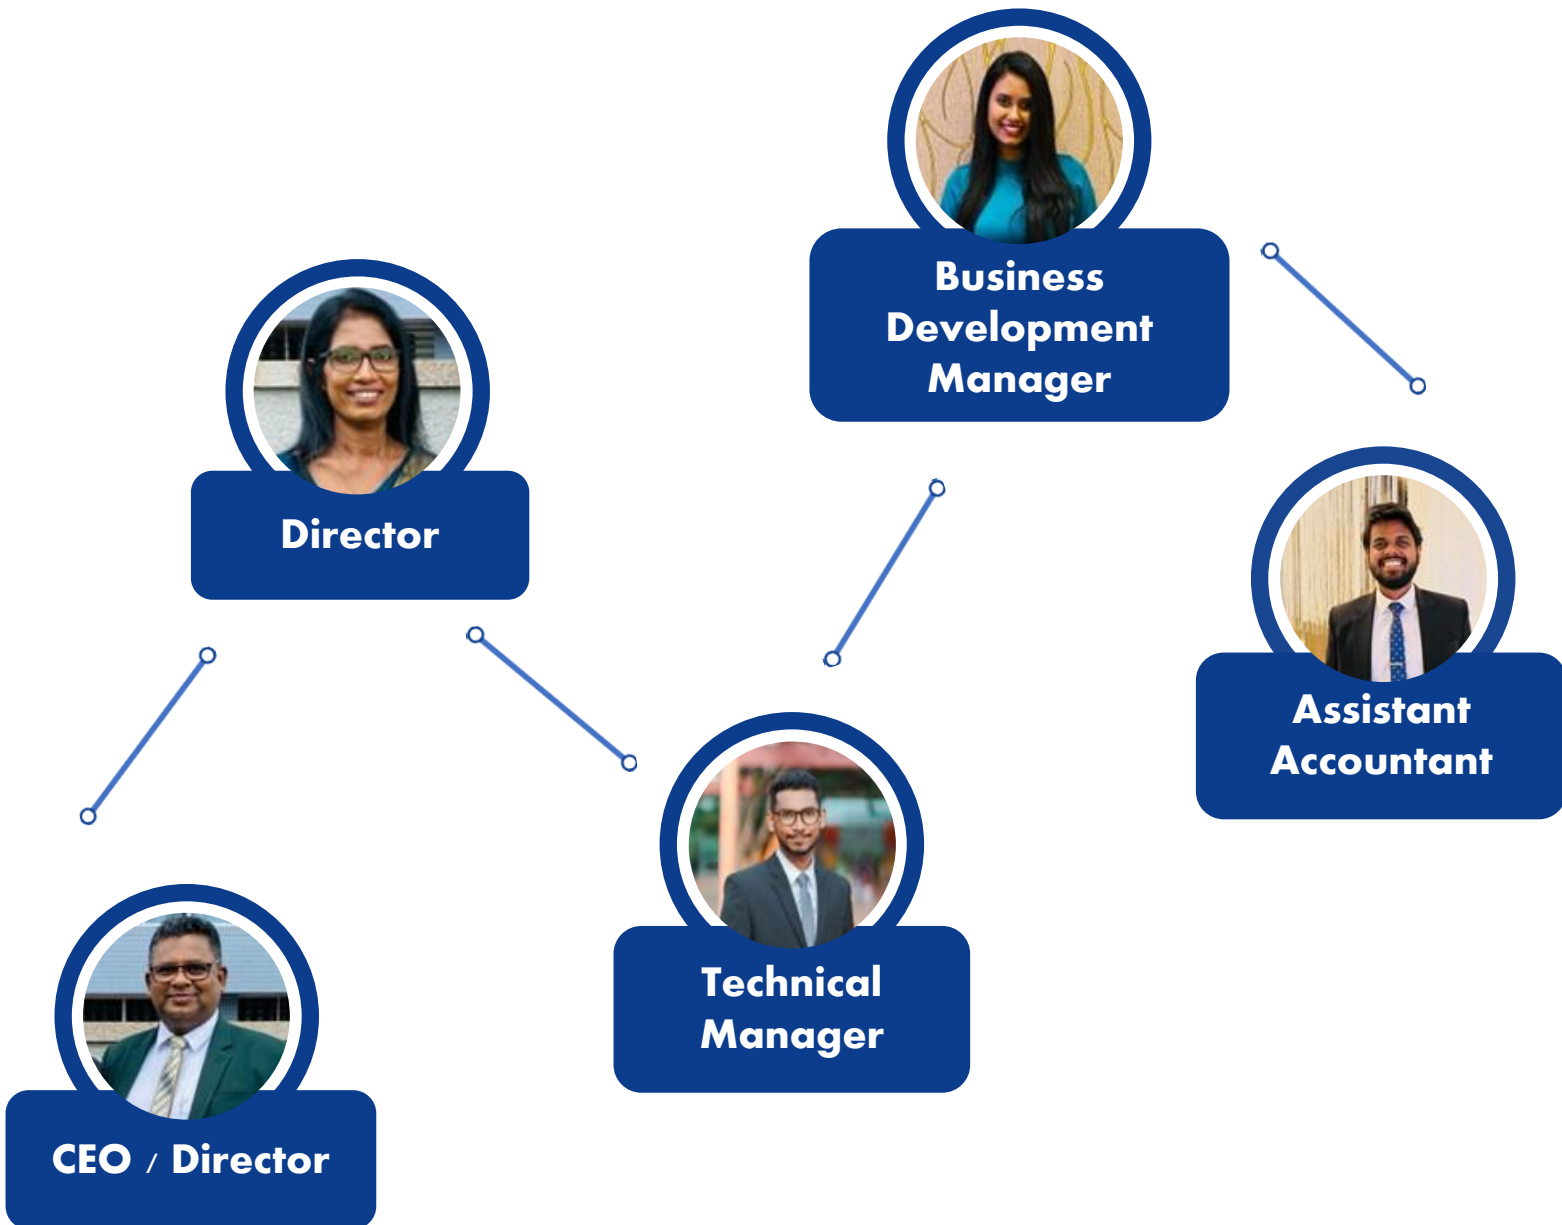

Keeness

We maintain our keenness in every task by assuring the constant attentiveness on the dynamic business context.

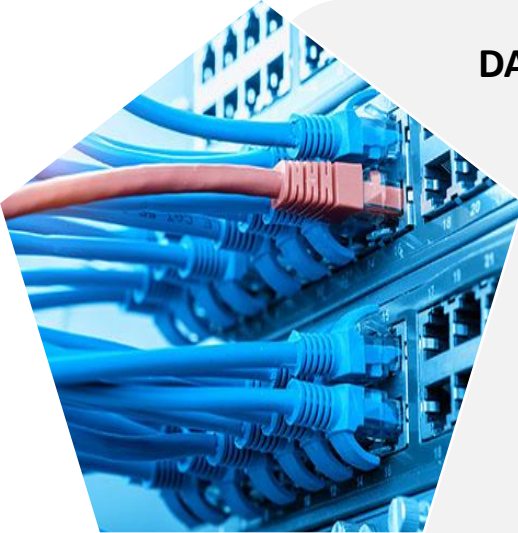

KEY PEOPLE

Our team comprises experienced professionals (each with 15+ years of experience) with an impeccable track record in the field of networking & support services and an enthusiastic new group of beginners who work hard to excel in the field.

OUR SERVICES

We can design and enhance your network to fully support the business needs and context including availability, redundancy, security and centralized management.

DATA & VOICE CABLING

Our cabling engineers have experience and expertise in both data and voice solutions and are used to working with a wide cross section of industries including schools, industrial and commercial premises.

FIBER CABLING

We can design and install end to end Fiber Optic Cabling to meet your networking scope and performance.

SERVER ROOM CONSTRUCTION

We can design and enhance your Server room infrastructure with disciplines like climate control, electrical engineering, IT, construction work, monitoring, security, etc. from both performance and efficiency perspective.

OUR SERVICES

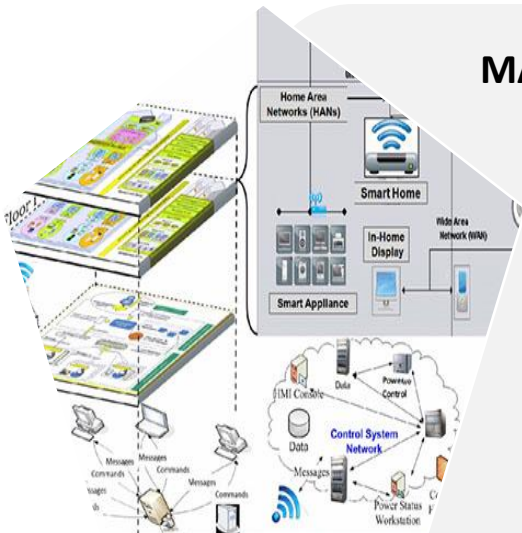

FIREWALL & SECURITY

Firewall and Security for services to help you in staying secure from several attacks launched on your servers every day. Centralized management and monitoring of firewall to protect your infrastructure from every security breach.

ACCESS CONTROL SYSTEMS

State-of-the-art access control software that integrates the most advanced security technologies with innovative networking capabilities to bring you full-featured security solutions serving any size facility integration and implementation.

MAINTENANCE AGREEMENTS

Our maintenance agreements are designed to detect or prevent a fault from occurring. Apart from the repairs which are restoration work for when something gets broken, damaged or stops working, we ensure to provide routine activities to prevent damage and prolong the life of appliances.

OUR SERVICES

ELECTRICAL DESIGN

Electrical schematics, layouts, and other grid plans for their organization. They must develop effective, safe electrical diagrams, provide assistance in the installation of equipment and systems, and perform design computations using their engineering skills.
